

## AUTOMATED, SECURE DIGITAL EVIDENCE MANAGEMENT

HELIOS™ – a powerful, dynamic, and user-centric digital evidence management platform, enabling effective analysis and management of digital evidence workflows. Additional capabilities include evidence file and case review, transcription, and redaction all while maintaining the strictest chain of custody with flexible permissioned-base file sharing. HELIOS by Utility - bringing ease and automation to case management and the discovery process through a fully encrypted platform.

### EVIDENCE GATHERING:

Easily connect with Utility's POLARIS digital evidence management platform and other cloud-based platforms using pre-built tools.

### EVIDENCE REVIEW, PREP:

Use smart editing tools with strict evidence version control to manage cases.

### EVIDENCE SHARING:

Share evidence with confidence and make discovery easier with permission-based evidence sharing and distribution groups.
