# UTILITY®

A UNIVERSE OF SOLUTIONS

Advanced Body Cameras, In-Car Video
& Digital Evidence Management System

EOS by utility™   ## ROCKET by utility™

POLARIS by utility™   ## HELIOS by utility™

Utility's universe of solutions includes intelligent body cameras, in-car communications and video systems, AI-driven license plate recognition and digital evidence management with smart video redaction, translation, and transcription

IN THE FIELD:
Enable officers to focus on their job and their safety, not worrying about a device or getting video offloaded

AT THE STATION:
Live view of situations through fixed camera integration with evidence analysis and management in one, CJIS compliant platform

AT THE FACILITY:
Maintain officer and inmate safety and security while keeping the facility in full view

AROUND THE SCHOOL:
Stay connected with devices, active alerts and technology focused on keeping campuses safe

FOR THE LEGAL PROCESS:
Manage and share digital evidence from end to end in a completely secure and scalable environment

- Smart, Secure, Patented, Body Cameras
- High Definition In-Car Video
- Automated License Plate Recognition and Analysis
- Automatic and Policy-Based Alerts and Recording
- Real-Time Video Offload
- Officer Down Alert
- BOLO and Mass Communications
- Active Shooter Response Technology
- Live Video and Body Camera Streaming
- Fixed Camera feeds (including available DOT)
- Geofencing and Action Zones
- Real Time Observation - Map Views and Mutual Aid
- Automated Incident Classification
- Automated Workflow with CAD Integration
- Rigorous Chain of Custody
- Citizen Camera Registry
- Community Crowd Source Requests
- Single Source to Access Evidence Files

Bringing together a universe of technological solutions that collect, analyze, and manage evidence — keeping you situationally aware

EOS
by utility™

REVOLUTIONARY PATENTED BODY-WORN TECHNOLOGY

Robust evidence collection device for law enforcement, utilizing patented body worn technology to ensure device stability and consistent data collection through complete autonomy – allowing officers to focus on the job and not the device.

PATENTED TECHNOLOGY:
Patented technology ensuring the device stays securely mounted while in use

POLICY-BASED AUTOMATION:
Automatic policy-based recording capabilities activating the body worn device, letting the officer focus on the job – not pressing a button

ENCRYPTED REAL-TIME OFFLOAD:
Immediate encrypted evidence offload with access to Wi-Fi, SIM card, and Utility's ROCKET device

- Securely Mounted in the Uniform
- Officer Down Detection
- Pre-Event Recording of Audio and Video
- Automated Recording Triggers based upon Door, Lightbar, Shotgun Rack, and Siren sensors
- Foot Pursuit and Struggle Activation
- Holster Sensor Activation
- Bluetooth enabled Media Controller
- Automated Driver's License Capture
- Incident Classification
- Live Stream from Camera with Recording Notifications
- Real-Time BOLO, Amber, and Silver Alerts
- Action Zone based policy recording
- Multilingual Interface

Saving the day through time-saving – often life-saving – digital efficiencies

ROCKET
by utility™

A ROBUST IN-CAR SOLUTION

We combined our cellular enabled and Wi-Fi router with our in-car video system to make it the most powerful and reliable communication solution available.

PROVEN WIRELESS GATEWAY:
High-speed access for reliable video offload

WIFI HOTSPOT AROUND VEHICLE:
Have access to a mobile hotspot in the officer's vehicle for immediate, encrypted evidence offload

- Front and Rear Facing HD Cameras
- Internal DVR and Video Vault
- Secure Wireless Upload to the Cloud
- Automatic Vehicle Sensors
  - Crash Sensor
  - Door
  - Lightbar
  - Siren
  - Shotgun Rack
  - Vehicle Diagnostic Reporting
- Dual Antennas for Enhanced Signal Strength
- Tough and Rugged
- GPS Tracking and History
- FirstNet Certified
- Pairs with Utility ALPR

Secure, Simple, Smart

POLARIS
by utility™

DIGITAL EVIDENCE MANAGEMENT

A Versatile, intuitive platform for collecting, analyzing, and managing digital evidence

POLARIS by Utility delivers integral analysis and case management from any source in one CJIS compliant platform. With a comprehensive chain of custody and data agnostic flexibility, POLARIS focuses on technical capabilities and security to reduce your IT burden.

REAL-TIME AWARENESS:
View feeds from fixed cameras, in-car cameras and body worn devices all in a live view map for full transparency of current situations

SMART REDACTION:
Quickly establish and manage case files and related media with smart, in-application redaction tools for all media and document file types (video, audio, photos, texts, phone, documents, and license plates).

ONE PLATFORM:
Incorporate all digital evidence into one common platform for management.

CUSTOMIZABLE:
Role-based user permissions and customizable system configurations make this scalable platform adapt to your agency's specific needs

- Front and Rear Facing HD Cameras
- Internal DVR and Video Vault
- Secure Wireless Upload to the Cloud
- Automatic Vehicle Sensors
  - Crash Sensor
  - Door
  - Lightbar
  - Siren
  - Shotgun Rack
  - Vehicle Diagnostic Reporting
- Dual Antennas for Enhanced Signal Strength
- Tough and Rugged
- GPS Tracking and History
- FirstNet Certified
- Integrates with Utility ALPR

All digital evidence - in a single platform

UTILITY®

HELIOS
by utility™

AUTOMATED, SECURE DIGITAL EVIDENCE MANAGEMENT

Effectively manage digital evidence workflows with the ability to review, transcribe, translate, and redact, HELIOS by Utility maintains the strictest chain of custody with flexible permissioned-base file sharing. HELIOS brings ease in automation to case management and the discovery process in a fully encrypted, CJIS compliant management system.

EVIDENCE GATHERING:
Easily connect with Utility's POLARIS digital evidence management system and any other platform using pre-built tools

EVIDENCE REVIEW, PREP:
Use smart editing tools with strict evidence version control to manage cases

EVIDENCE SHARING:
Share evidence with confidence and make discovery easier with permission-based evidence distribution and groups

- Direct Integration with Polaris
- Pre-built Integration Tools for other Platforms
- Windows Based (bulk) File Import Tool
- Transcribe Video and Audio Files
- Multiple Language Translation
- Documents - Redact Text, Highlight Key Passages, or Insert Comments
- Video Editing - clip creation, person, and object identification, tracking and redaction
- Permissions-based Case Assignment, Access Levels, and Sharing
- Assign Files and Request Input
- Track Case Status and Key Points using Tags, Marks, and Notes
- Flexible Digital Evidence Folder Structure
- Share Group Assignment
- Secure Cloud Storage - Encrypted (transit and at rest) with Flexible Retention Policies

Overcome evidence administration challenges with a purposefully built evidence storage and management system

UTILITY®

ALPR

AI-POWERED LICENSE PLATE CAPTURING AND ALERTING SOLUTION

Strengthen the effectiveness of evidence collection and analysis with Utility's Automated License Plate Reader alerting solution. As a part of the Utility Universe of Solutions, ALPR provides a head start on any location or vehicle-based investigation.

MOBILE:
Externally vehicle mounted cameras capturing two lanes of license plates, powered by The Rocket

PORTABLE:
Solar powered, cellular connected ALPR cameras for situational based deployments

FIXED:
Solar or direct powered, fix mounted ALPR camera for capturing all passing vehicles

- AI-based Analysis, Extracting Vehicle License Plate, Make, Model and Color from a Single Image

- Computer Aided, Real-Time Hotlist Matching

- Real-Time License Plate Capture, Analysis, and Hotlist Matching whether Fixed, Mobile, or Portable

- Proximity and Hot Zone Alerting and Searching

- BOLOs are matched against License Plate Captures for Local Hotlist Hit Notifications

- Fully Integrated to Polaris for Access and sharing of License Plate Captured Data

- Ability to add Live Streaming and Gunshot Detection

ALPR provide additional boots on the ground that don't need a break, sleep or take a vacation.
